Smart Fridges

Fridges are becoming clever. With ¹ _____ internet connection and ² _____ computer, fridges know how much food you have got and how much you need; they can give you ³ _____ recipe you want and even connect to ⁴ _____ oven then tell it how hot it needs to be and how much time it takes to cook your food. How does it work? The fridge's computer knows what you have got by scanning the barcodes on the items you put in to it. It can tell how much food you have got – how much milk you have got, if you've got ⁵ _____ eggs, how many tomatoes you have got or when there isn't ⁶ _____ butter. ⁷ _____ fridges can even talk to you. Ask 'Is there ⁸ _____ salad?' and the fridge tells you 'Yes, there is ⁹ _____ salad.' or 'No, there isn't ¹⁰ _____.' For people on ¹¹ _____ diet, the fridge tells you what you can or can't eat – perhaps you can't have ¹² _____ meat or cakes – unfortunately the fridge knows it and tells you!
