5. _____

B. Write questions with the past continuous from of the verbs in the box.

do listen make play play watch

a you / to music when I called you?

b your brother / computer games?

c What / your parents?

d Where / your sister / tennis?

e your friends / a DVD?

f Who / that terrible noise?

C. Read the text and choose the correct answers.

Everyone watches television. It is a very important part of everyday life and it is difficult to imagine life without television. Today, we have digital television, and you can also watch television programs on your personal computer. But do you know who invented the first television system, and when it was invented? The Scottish engineer, John Logie Baird, is often known as 'the father of television' because he invented the world's first working television system. Baird was born in 1888 near Glasgow, Scotland. As a young man he was extremely interested in technology. He studied at the West of Scotland Technical College and later at Glasgow University. Unfortunately, he did not complete his studies because World War I began in 1914. After the war, Baird moved to England and began working to develop a television system. In 1923, in the town of Hastings on the south coast of England, Baird transmitted a moving image for the first time, and in 1925 he transmitted the world's first television picture. In 1927, Baird sent a long-distance television signal using telephone lines from London to Glasgow, a distance of 438 miles (705 kilometers). The following year, he sent a picture from London to New York. That same year the Baird Television Development Company made the first television program for the BBC. In 1939, Baird helped develop color television. He also invented a video recording system. Baird invented a number of other things, including thermal socks! He died in 1946.

- a Where was John Logie Baird born?
() near Glasgow () near London
- b How old was he when he died?
() 58 () 78
- c When did he transmit a moving image for the first time?
() 1923 () 1925
- d Who made the first television program for the BBC?
() John Logie Baird () the Baird Television Development Company
- e When did Baird transmit the world's first television picture?
() 1923 () 1925
- f How far is it from London to Glasgow?
() more than 700 km () almost 800 km
- g When did Baird send a picture from London to New York?
() 1927 () 1928

D. Complete the text by choosing the correct words.

Last year we spent our vacation in Rome. One morning we came (a) **out of / over** our hotel and walked (b) **across / under** the street. We went (c) **away from / into** a small café and ordered some coffee. Then a man came into the café and walked (d) **along / towards** us. He sat down at our table and put his bag (e) **under / down** the table. The man ordered a coffee and drank it quickly. Then he got up and left, but he forgot his bag. I picked it up and ran (f) **through / across** the door and (g) **out of / up** the café (h) **away from / into** the street. The man was walking (i) **over / through** a bridge (j) **across / towards** a bus stop. I reached him just in time.
