# Complete the poem with a consonant blend word:

This is a \_\_\_\_ory  
Or maybe a song  
Not really short  
But not awfully long

It is mea\_\_\_\_ for young readers  
Who are curious and keen  
To know more of this virus  
Called the Covid-19

I will try to explain  
Why our lives may have changed  
And why our world  
Is acting so \_\_\_\_ange  
And then I will guess  
When should the world  
Return to be normal

So let's \_\_\_\_art from the \_\_\_\_art  
The beginning of all  
With a creature called "virus"  
Very tiny and small  
Who infected a person  
While eating his dinner  
Without even knowing  
He will be the beginner  
Of a worldwide pandemic

So what is this virus  
You probably a\_\_\_\_  
And why should we all  
Keep wearing a ma\_\_\_\_?  
Well the fi\_\_\_\_ you should know  
That it's not something new  
Viruses have been here  
Way before me and you

With most we fight  
And no symptoms are seen  
With some we do well  
By getting vaccines

But once in a lifetime  
Knocks on our door  
A new tiny virus  
That was not here before  
And it multiplies fa\_\_\_\_  
And it travels with ease  
Within people's saliva  
Or better a \_\_\_\_eeze

And until a vaccine  
Is hereby created  
The government asks  
That we stay isolated  
Wa\_\_\_\_ our hands  
With soap and with gel  
While \_\_\_\_aying at home  
\_\_\_\_otected and well

But let me assure you  
Without fooling arou\_\_\_\_  
That not before long  
A vaccine will abound  
And one day or one night  
Or soon before dawn  
This tiny corona  
With mostly be gone

And li\_\_\_\_ will return  
To their normal routine  
Before the pandemic  
Of COVID-19
