

Cause and Effect

A Bee's Life

Bees get food from flowers.

A bee takes the food back to the hive.

Then the bee dances for the other bees.

The dance tells the other bees
where to find food.

Bees look for food in warm weather.

In cold weather, bees stay in the hive.

Then they eat the honey stored in the hive.

Read the first part of each sentence.

Select the words that tell what happens next.
