

**Which sentences in the paragraph below need an in-text reference?**

The fashion industry has a great impact on water loss ( ). Recent statistics show that the textiles and fashion industry are responsible for about 7% of global groundwater and drinking water losses, especially in China and India's water-stressed production regions ( ). In addition, cotton use in Europe was considered to be responsible for 20% of the water loss in the Aral Sea ( ). Moreover, the fashion industry has an effect on local water sources because it produces wastewater ( ). This is due to the fact that during manufacturing, some toxic chemicals may enter and wastewater may not be treated properly and enter the local groundwater, causing the entire ecosystem to deteriorate ( ). For example, the fashion industry in Cambodia accounts for 88 percent of all industrial production, and is estimated to be responsible for 60 percent of water pollution and 34% of chemical pollution ( ).
