VIDEO STARTS AT 0:45

This video comes up with suggestions in order to reduce our excessive consumerism. Complete these spaces with one word. If it is a quantity, use numbers. The sentences are not literal, so you must understand the idea and use the key words.

1. buying too much making a shopping-
We would reduce our CO2 emissions by percent just by keeping our clothes for a minimum of 1 year.
Buy products from origin, especially if they are
2. We should not buy new devices until the old ones do not work. We should
our electronic devices whenever we are not using them, and keep them turned
3. Turn off the lights when you are not using them. Also, take instead of baths.
Save energy by using energy-saving light, LEDS are highly recommended.
A bicycle would be the perfect of transport.

Personal consideration. Write a list of the most useless thing(s) you have purchased in your life.
