Name

Design a cover for a music CD. The album cover will embody your world, your community and your dreams. You can re-design an existing album cover, or invent a fantasy band – starring you.

Imagine yourself as a DJ, a singer, or in a band: what will your message be? Love, anti-xenophobia, women's rights, sport, hope for mankind? What will your brand and your music be about, today? What is your genre: gospel, hip-hop or indie rock? Find images for this genre in newspapers, magazines, on the internet or at home: see some examples here. Look at lettering and different fonts used on album covers. How will your image, title and text reflect your message and mood?

You will use the following link to design your cd cover online and submit your final project to the school platform

Here you are going to explain wat your cd cover represents and why you choose this design. Give a short prompt of you design.
