

UNIT 5
LET'S EXPERIMENT

Name : _____
Form : _____

LISTENING

- A** You are going to hear a teacher talking about a science experiment in the classroom. Before you listen, read through the statements and underline the key words.

Do the following statements agree with the information in the listening passage? Write **True** if the statement agrees with the information and **False** if the statement contradicts the information.

- 1 The experiment is about how to get an egg into a bottle.
- 2 For this experiment, you only need a glass bottle and some eggs.
- 3 Boil the egg for about 20 minutes at low temperature setting.
- 4 You might want to boil more than one egg, so you can repeat the experiment a few times.
- 5 Drop three matches into the bottle when using this method to fit an egg into the bottle.
- 6 Cover the opening of the bottle with the egg as soon as possible, so the heat won't escape.
- 7 When the volume of the air drops, it exerts considerable pressure on the egg.
