- ☐ a. That's easy!
- ☐ b. I've done that before!
- ☐ c. That's amazing!

READING

1. Read the text below. Choose the correct answer.

Bermuda triangle

The Bermuda triangle has long been called the devil's triangle or a mysterious area of the Atlantic Ocean since **(1. a number of/ a large amount of)** ships and planes have gone missing. This sea area is surrounded by Bermuda, Puerto Rico and Miami. In here, compasses don't work. So, what happened there? why is this place so famous? and has anyone or anything been

found yet?

This area is about 500,000 square meters and one of the earliest sailor Christopher Columbus who sailed here once recorded a great flame of fire **(2. falling into/ rising from)** this area and there are some strange lights appearing a few weeks later. In 1918, Cyclops, a huge cargo ship which carries over 300 people sank into the ocean with no any call that is sent out by the sailors. After a long search, there was nothing found; the president Woodrow Wilson, later said that what happened to the ship is only known by the sea itself and the God. There's one interesting fact that the Bermuda Triangle was one of the very **(3. few/many)** places on Earth where true north and magnetic north lined up. This probably gives reason why so many sailors went missing before.

Some people think that these events are caused by the aliens, a fire crystal ball in Atlantis which is thought to lie under Bermuda, sea monster, and so on. Many people, **(4. however/moreover)**, don't think this sea area is anything more special than the other sea. As some people say, trying to find a common cause for every Bermuda Triangle disappearance is not more logical than trying to find a common cause for car accident in Arizona.

Until now, there hasn't been one theory that solves this mystery, and we still don't know if the lost people are alive or not. Is there another world that the Bermuda leads to? Can we see anyone who came back from this mysterious sea? We don't know. But the only thing you have to know is that most planes and ships don't usually go missing in this area now. However, next time if you fly above the Bermuda triangle, you can look **(5. down/up)** and see if there's anything like the lost city Atlantis or look up and see if there are UFOs...

2. Read the text again and answer the following questions:

a. Why is the Bermuda Triangle called the devil's triangle?

.....

.....

.....

b. How large is it?

.....

.....

.....

c. What's the reason why so many sailors went missing before?

.....

.....

.....

d. Explain the following sentence with your own words.

"Trying to find a common cause for every Bermuda Triangle disappearance is not more logical than trying to find a common cause for car accident in Arizona."

.....

.....

.....

e. What do you think about the Bermuda Triangle? Which explanation about its mysteries do you agree with?

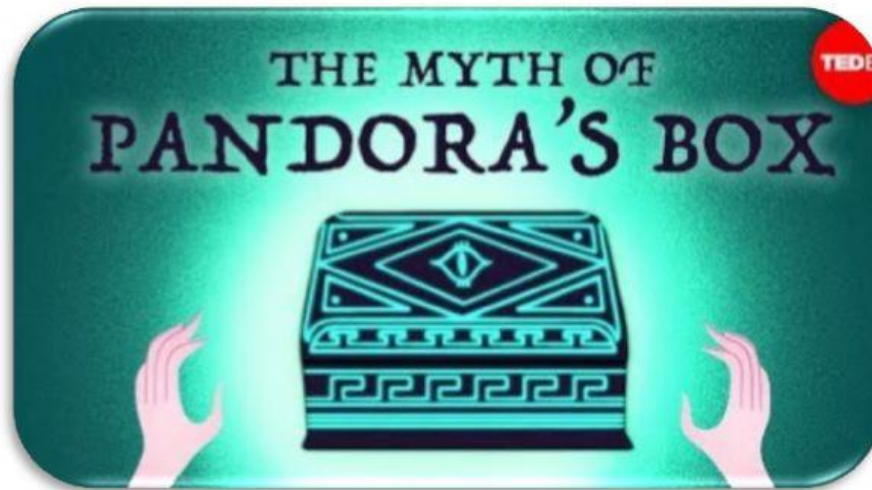

.....

.....

.....

LISTENING

Watch the following video and answer the questions below.
