

Faster and Slower

You can make an object go faster or slower by changing 2 things:

1. The size of the force

2. The amount of friction

How can Lucy make the ball move quicker?

How can Tim go **quicker** down the slide?

How can Dan make the bike go slower?

How can Josh make the box move quicker?

How can Sally make the ball move slower?

How can Jess make the ball move quicker?
