WORKSHOP 2 – MULTIPLICATION OF DECIMAL NUMBERS

Read the problem, propose a solution and select the correct answer

1.

A gallon of water weighs 8.3 pounds. Simon uses 11.81 gallons of water while taking a shower. About how many pounds of water did Simon use?

2.

A snail moves at a speed of 2.39 inches per minute. If the snail keeps moving at this rate, about how many inches will it travel in 7.5 minutes?
