

READING COMPREHENSION #1

READ AND RECORD YOUR VOICE

It's *All* Music

People made music before they could write about it. One of the oldest instruments ever found is more than 42,000 years old. It's a flute. Instruments like flutes are called *wind instruments*. The music comes from moving air, usually when a person blows into the instrument. Each wind instrument has a shape that makes its sound different. Some have holes for fingers to cover. Others have buttons to press. Holes and buttons let you change the way the air travels to change the notes.
