

Instruction : complete the table below.

Sound energy	Heat energy	Potential energy	Light energy	Electric energy
Nuclear energy	Solar energy		Kinetic energy	Chemical energy

No	Types of energy	Details
1		- Energy from the sun - Gives solar energy - Can gives electric energy
2		- comes from the objects that contain heat
3		- Generated by object that emit lights
4		- Generated by object that vibrates
5		- Run through a complete circuit - Making elektrik object functioning
6		- energy that is kept inside food, candle, battery and fossil
7		- generated by moving object
8		- kept inside an object from certain height or compressed
9		- energy that is comes from nuclear like uranium
