

MATEMATIKA TINGKATAN 2

MARKAH

Menentukan
titik tengah
antara dua titik

BAB 7: KOORDINAT

Oleh Cikgu Naliza @SMKBKT

Hitung titik tengah bagi setiap garis lurus yang berikut

$$\begin{aligned}\text{Titik Tengah} &= \left(\frac{-4 + 6}{2}, \frac{3+9}{2} \right) \\ &= \left(\frac{\boxed{}}{2}, \frac{\boxed{}}{2} \right) \\ &= (\boxed{}, \boxed{})\end{aligned}$$

$$\begin{aligned}\text{Titik Tengah} &= \left(\frac{-6 + 8}{2}, \frac{5+3}{2} \right) \\ &= \left(\frac{\boxed{}}{2}, \frac{\boxed{}}{2} \right) \\ &= (\boxed{}, \boxed{})\end{aligned}$$

$$\begin{aligned}\text{Titik Tengah} &= \left(\frac{\boxed{}}{2}, \frac{\boxed{}}{2} \right) \\ &= \left(\frac{\boxed{}}{2}, \frac{\boxed{}}{2} \right) \\ &= (\boxed{}, \boxed{})\end{aligned}$$

$$\begin{aligned}\text{Titik Tengah} &= \left(\frac{\boxed{}}{2}, \frac{\boxed{}}{2} \right) \\ &= \left(\frac{\boxed{}}{2}, \frac{\boxed{}}{2} \right) \\ &= (\boxed{}, \boxed{})\end{aligned}$$
