For questions 1-3, type your final answer in simplest form in the box.

1. $2\frac{1}{2} \times 3 =$

2. $\frac{3}{4} \times 4\frac{1}{2} =$

3. $1\frac{2}{3} \times 5\frac{5}{6} =$

4. Jane planned to interview some people for a job opening. She scheduled a meeting every $1\frac{5}{6}$ hours. How many hours will it take to interview 5 people?

Fill in the **first box with the math operation needed to answer this problem. In the **second box**, fill in the problem changed into improper fraction form. In the **third box**, fill in the answer with a label.

$1\frac{5}{6}$ 6 = =
