## TOPIC: E-HAILING TECHNOLOGY

LS: 1.1.2,1.2.1

A. Listen to the dialogue below.

AUDIO LINK: <http://arasmega.com/qr-link/e-healing-technology/>

**Roslan:** Anju, have you heard about e-services technology?

**Anju:** I've never heard about it.

**Roslan:** Well, "e" is short for electronic. It is the use of electronic technology by companies to provide services to its customers.

**Anju:** Electronic technology? But how?

**Roslan:** Well, they use the Internet as the main channel for e-services. For example, to order car services, we need to download the e-hailing application **into** our smartphones **from** the Internet.

**Anju:** That easy? Are you sure?

**Roslan:** Yes! After downloading the apps all we have to do is just type **from** where we are and **to** where do we want to go.

**Anju:** Wow, this saves a lot of time! Besides e-hailing what other e-services are there?

**Roslan:** Hmm... we have e-ticket services where you can purchase movie tickets, bus or train tickets online or buy them through automated kiosks. Even job application can be made through online now.

**Anju:** Wow, thanks Roslan for the information! Well, I'm going to ask my father to download the e-hailing application. Who knows we might need it later?

**Roslan:** Yes. Anju, but we also must be careful. It would be best for us to travel with our parents or friends.

**Anju:** I will remember your advice Roslan.

**THEME 2**  
 Health and Environment

**A. Listen to the dialogue and tick ( / ) True or False for the statements below.**

1. The "e" in e-services stands for electronic.  
 True       False
