

## DAV HIGH SCHOOL, NAGARJUNASAGAR

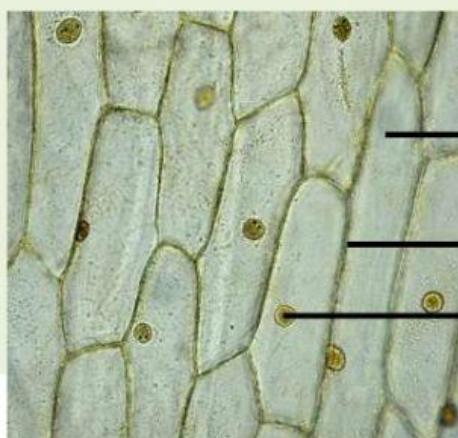

**CLASS: 8**

**SUB: BIOLOGY**

- The cells in a match stick and cork are ( )  
a. Living      b. dead
- The cells of onion are transparent, to see them clearly we should use ( )  
a. Acid   b. stain   c. water   d. glycerin
- The outer covering which gives rigidity to the plant cell is ( )  
a. Cell membrane   b. cytoplasm   c. nucleus   d. cell wall
- Plasma membrane is present in both plant cell and animal cell. ( )  
a. True      b. False
- A tree and human being are examples of \_\_\_\_\_ human beings ( )  
a. Unicellular   b. multicellular
- Identify:

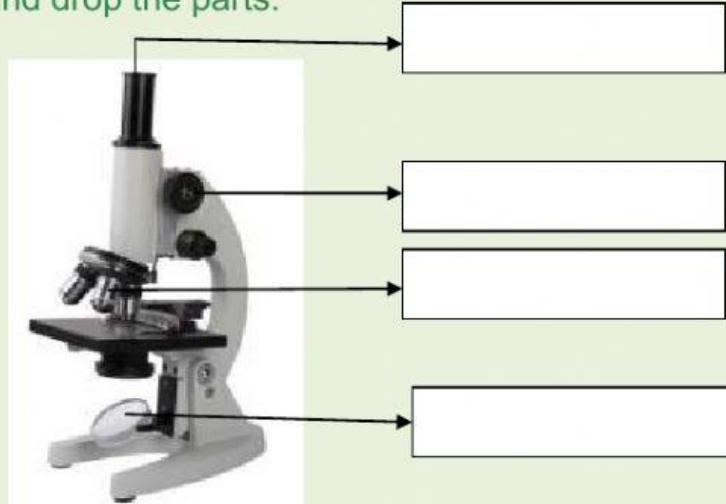

- Identify the parts:

- This gives a shape to the cell and selectively allows substances ( ) to pass through it, in and out of the cell.  
a. Cell membrane b. cell wall c. nucleus d. cytoplasm
- The longest cell is ( )  
a. Bone cell b. blood cell c. muscle cell d. nerve cell
- The organism with no definite shape ( )  
a. Chlamydomonas b. Paramoecium c. Amoeba d. None
- The cells in elephant are larger than in human being ( )  
a. True b. False
- All living organisms are made up of \_\_\_\_\_.

- Drag and drop the parts:

Mirror

Coarse adjustment

Eye piece

Objective lens

- This is used to prevent drying of specimen while preparing the temporary mount ( )  
a. Safranin b. methylene blue c. glycerin d. glass slide
- 1mm = \_\_\_\_\_ microns or micrometers.
