

# LEMBAR KERJA PESERTA DIRIK (LKPD)

**KELAS 4**

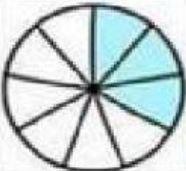

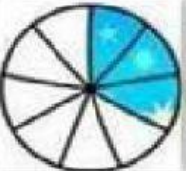

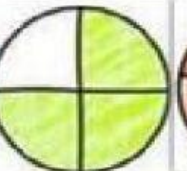

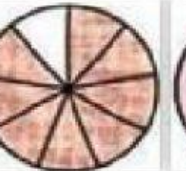

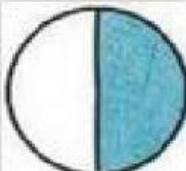

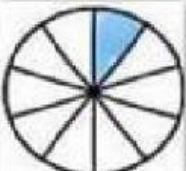

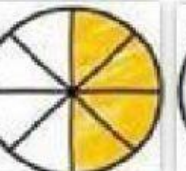

**SDN KLENDER 14**

**PECAHAN**

Masukkan gambar pecahan yang sesuai pada kotak yang disediakan!

$\frac{3}{9}$		$\frac{3}{6}$		$\frac{8}{9}$	
$\frac{4}{5}$		$\frac{3}{4}$		$\frac{1}{10}$	
$\frac{1}{3}$		$\frac{4}{8}$		$\frac{5}{7}$	
$\frac{3}{9}$		$\frac{3}{3}$		$\frac{1}{2}$	

Tentukan pecahan senilai dari pecahan yang ada!

$\frac{1}{2} = \frac{\square}{4}$	$\frac{1}{3} = \frac{\square}{6}$	$\frac{2}{6} = \frac{\square}{12}$
$\frac{1}{2} = \frac{\square}{8}$	$\frac{1}{3} = \frac{\square}{12}$	$\frac{2}{6} = \frac{\square}{3}$
$\frac{2}{4} = \frac{\square}{8}$	$\frac{4}{8} = \frac{\square}{2}$	$\frac{4}{12} = \frac{\square}{3}$
$\frac{2}{4} = \frac{\square}{2}$	$\frac{4}{8} = \frac{\square}{4}$	$\frac{4}{12} = \frac{\square}{6}$

Tentukan pecahan yang paling sederhana dari pecahan di bawah ini!

$$1) \frac{3}{9} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$6) \frac{10}{35} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$2) \frac{4}{10} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$7) \frac{21}{35} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$3) \frac{3}{15} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$8) \frac{18}{20} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$4) \frac{6}{8} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$9) \frac{3}{27} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$5) \frac{9}{12} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

$$10) \frac{5}{45} = \frac{\boxed{\dots}}{\boxed{\dots}}$$

Berilah tanda < atau > sebagai perbandingan yang tepat!

1.  $\frac{1}{4}$    $\frac{2}{4}$

6.  $\frac{2}{3}$    $\frac{2}{4}$

2.  $\frac{2}{4}$    $\frac{3}{4}$

7.  $\frac{1}{2}$    $\frac{1}{3}$

3.  $\frac{1}{3}$    $\frac{2}{3}$

8.  $\frac{3}{8}$    $\frac{3}{6}$

4.  $\frac{3}{5}$    $\frac{2}{5}$

9.  $\frac{2}{6}$    $\frac{2}{4}$

5.  $\frac{6}{8}$    $\frac{4}{8}$

10.  $\frac{1}{8}$    $\frac{1}{6}$
