PART 3 MCQ LONGER TEXT**[8 marks]**

Questions 19 to 26 are based on the following passage. Read the passage and then circle the answer A,B or C .

The sea turtles, especially the leatherbacks, are undoubtedly one of nature's most amazing creatures. They roam the warm seas of the world throughout their life and come ashore only to lay eggs. Malaysia with its long sandy shorelines has been destined as one of their breeding grounds. Unfortunately, the number of leatherback turtles landing on the beaches has been declining over the years. According to the WWF estimates, about 2000 leatherbacks arrived on Malaysian beaches in 1970. In 1989, only between 30 and 60 leatherbacks were found. The drastic drop within such a short span is certainly a great cause for concern. Where have they gone to? Are they avoiding the beaches of Malaysia ? Whatever it is, the message is disturbingly clear -- they may become an extinct species soon, that is, if no concerted effort is taken to check the decline now.

The belief that the declining landings of turtles in Malaysia is the result of increasing landings in others parts of the world is a fallacy. This is because the scenario is the same in other countries known to have been visited by the turtles. What has caused the species to dwindle at such a rapid rate ? There are many reasons but an obvious one is none other than man's greed. As we know, turtles are killed for their meat. In the days before refrigeration, turtles had been a source of fresh food for the sailing ships. Today, turtle soup is a favorite dish among the Asians. Their shells have become coveted items for decorations and jewelry. Their eggs which are meant to be hatched into young turtles, are instead harvested and eaten. When deep sea fishing nets inadvertently trap the turtles, fisherman often kill the turtles instead of cutting their nets to release them. Pollution of the sea has also reduced the number of turtles. Many are choked to death by the plastic bags that they mistake for jelly fish. It appears that the turtles are no longer safe in the sea where they spend most of their lives.

Neither are they safe when the females come ashore to lay eggs. In fact this is the time when they are particularly vulnerable as their movements are slow on land. The nesting places for these turtles have also been greatly reduced, As more and more beaches are taken over for tourism with the construction of hotels, chalets and condominiums, the breeding grounds are reduced in the process. The intrusion of tourists into these places make it difficult for the turtles to lay their eggs. They have to look elsewhere to places that are still quiet and undisturbed to lay their eggs. Unfortunately these ideal places are few to come by now. Too much development has taken place even along the coastline in most countries

Question 33-36

We interviewed teachers from the ICT Club about their opinions on WORLD WITHOUT BORDERS. Read the opinions below and answer the questions.

WORLD WITHOUT BORDERS

A- Mahara, 34 years old I think it is all about Internet. The internet connection, the internet speed, everything about internet is what determines whether a world has border or not.
B- Samarinda, 28 years old For me, the world is in our palm. I mean hands, our hands. Just one click and we can see the world. Either on a computer screen or phone screen. If you see it virtually then the world doesn't have any borders. Borders only appear when you see the world as a reality.
C- Ramu, 32 years old I am not bothered or interested about the world having borders or not. All I think we should emphasize is a peaceful world.
D- Ali, 34 years old As said it is all technology. Technology has grown so fast that we can do everything even without stepping out of our house what more world. Of course borderless virtually. Now we can sit at home and watch places and can make us feel like we are travelling together. Hahaha.
E- Ah Chong, 28 years old I have nothing much to say. The more the world becomes borderless the more we will have problem. I am just being negative about it because I foresee a lot of consequences for having a world without border.
F- Lilitth-52 years old I love a world without border and I hope it will also become a reality not just virtually.
