Dolphins

Example

1 Dolphins are part of the whale family. They are smaller most whales and they have small teeth.

2 Dolphins are very smart animals. They learn things very and a dolphin can make noises to “talk” to another dolphin.

3 Dolphins live with their families. They like to play in the water and to jump of the water and back in again.

4 A lot of people sail boats say that dolphins like to be near people. They come very near to boats and sometimes they with the boats for days.
