The Life of Roald Dahl

Roald Dahl was a famous author. He was born on 13 September 1916 in Llandaff, Wales. Dahl first went to St Peter's, Weston-super-Mare, a boarding school. Then, he went to Repton, another boarding school in 1929. After finishing his schooling, Dahl travelled to Canada and then to East Africa.

At the age of 23 years old, he enlisted in the Royal Air Force where he became a fighter pilot. Dahl received severe injuries when the plane he was flying crash-landed in September 1940. After a long recovery, he worked as a British spy.

In 1953, Dahl married the American actress, Patricia Neal. They had five children. When one of his sons was in an accident, Dahl helped to invent the Wade-Dahl-Till valve in 1960. It helped to alleviate his son's head injuries.

Not long after that Dahl began his career as an author. His first children's novel was *James and the Giant Peach*. It was published in the US in 1961. This was followed by his most bestselling novel to date, *Charlie and the Chocolate Factory*. He later wrote screenplays for the James Bond hit *You Only Live Twice* and *Chitty Chitty Bang Bang*, and adult novels such as *Kiss Kiss*. Then in 1970, the children's novel *Fantastic Mr Fox* was published. A year later, the film *Willy Wonka and the Chocolate Factory* was released. It was based on his book. Dahl went on to write other well-loved books such as *Danny the Champion of the World*, *BFG*, *The Witches* and *Matilda*.

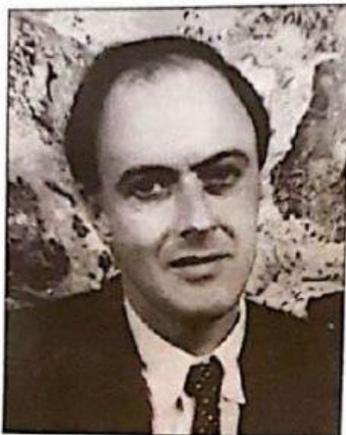

Roald Dahl died on 23 November 1990 in Oxford, United Kingdom. He was 74 at the time of his passing.
