Hot-Air Balloons

How do hot-air balloons fly? When the balloon is on the ground, people light gas to make a small fire. The fire heats the air in the balloon. Hot air always goes up. So, the balloon goes up slowly into the air. The balloon has a basket. The pilot stands in the basket and lights the gas to go higher. The wind blows the balloon along.

Example: 0. Fire heats the air in the balloon.

True False

1. Hot air always goes down.

True False

2. The pilot lights gas to go higher.

True False

3. The gas blows the balloon along.

True False
