The British diet

– STILL UNHEALTHY

Britain has a problem with obesity (more than 50% of the population are fat or overweight) and **the government** says we need to have a healthier diet. **However**, British shoppers are continuing to fill their supermarket **baskets** with unhealthy food.

A **survey** of 12 million consumers showed that 44 per cent of people have the same unhealthy eating habits that they had four years ago. The survey also found that shoppers who normally have a very healthy diet start buying **junk food**, e.g. frozen pizzas, crisps, and cakes, if there is a **crisis** in their lives, for example divorce, moving house, or losing a job.

Another thing the survey showed is that there is not much difference in price between a healthy shopping basket and an unhealthy one. A typical healthy basket costs, on average, £71.78 **compared with** £71.18 for an unhealthy one. Martin Hayward, the director of the study said 'Many people don't eat healthily because they worry that healthy food is more expensive, but the survey shows that this is not true. We believe the reason why some people eat unhealthily is because they don't know how to cook so they buy **ready-made meals**.'
