

LS: 2.1.1 (ii)

C. Read the text below.

Gadgets, Gadgets Everywhere!

Gadgets are everywhere in sight. From a smartwatch that is worn on the wrist to a drone that flies across the sky, gadgets are used everywhere. Every gadget functions differently. A smartphone is used for texting, calling, taking pictures, and playing games. A tablet and a smartwatch have the same functions as a smartphone too. A walkie-talkie on the other hand, is used for communicating with people nearby using radio signal. Lastly, a drone and a digital camera are used for taking pictures and videos. Even though the gadgets have different functions, all of them are created to make our life easier.

IT Tips
Surf the Internet and find out who invented your favourite gadget.

What would happen if gadgets do not exist?
