STI Worksheet

TRUE OR FALSE

READ EACH STATEMENT BELOW AND SELECT (T) IF IT IS TRUE OR (F) IT IS FALSE.

T	F		Sexually transmitted infections (STIs) are always accompanied by obvious symptoms.
T	F		STIs can be transmitted through infected blood by sharing needles, such as those used for tattoos and piercings.
T	F		All STIs can be cured.
T	F		All STIs have a serious impact on your health.
T	F		Some STIs have symptoms that only show up years later.

FILL IN THE BLANK

FILL IN THE BLANK USING THE WORD BANK. EACH RESPONSE MAY ONLY BE USED ONCE.

WORD BANK		
Get vaccinated	Infected blood	See a health professional
Be abstinent	Use a condom	No symptoms

- The most effective way to prevent pregnancy and STIs is to _____.
- A person may transmit an STI even if he or she has _____.
- One important method to prevent the transmission of STIs and pregnancy, but that is not 100% effective is to _____.
- Another way you can help protect yourself from certain STIs, like HPV and Hepatitis B, is to _____.
- In addition to intimate sexual contact, STIs can be transmitted through _____.
- Because there are many different symptoms for STIs, it is important to know your body and _____ if you notice anything unusual.

MATCHING

DRAW A LINE TO MATCH THE DESCRIPTION IN THE LEFT COLUMN TO THE CORRECT TERM IN THE RIGHT COLUMN.

Each of the descriptions and terms may only be used once.

Description

A contagious or infectious condition usually passed from one person to another during the exchange of body fluid

An infection caused by bacteria that can be cured with antibiotics.

No intimate sexual contact.

An infection caused by a virus that cannot be cured.

A thin, flexible sheath usually made of latex and worn on the penis during sexual activity to reduce the risk of pregnancy and STIs.

A virus causing inflammation of the liver, that cannot be cured but that can be prevented with a vaccine.

A virus that destroys the immune system, turning into AIDS (autoimmune deficiency syndrome), and the only STI that can also be transmitted by breastfeeding.

Term

Gonorrhea

Condom

Sexually transmitted infection

HIV (Human immunodeficiency virus)

Abstinence

Herpes

Hepatitis B
