

Multiplicación de Fracciones

Recuerda entregar la fracción simplificada al final si es necesario

$$\frac{3}{2} \times \frac{4}{5} = \frac{12}{10} = \frac{6}{5}$$

$$c) \frac{3}{10} \times \frac{5}{4} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$a) \frac{1}{2} \times \frac{6}{7} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$d) 8 \times \frac{7}{12} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$b) \frac{2}{4} \times \frac{1}{5} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$e) \frac{8}{13} \times \frac{13}{8} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$
