

Задачи по математика
Първо помисли, после отговори!

1зад. Постави знаците > = < :

$11 \square 13$

$15 \square 19$

$18 \square 18$

$16 \square 10$

$10 \square 17$

**2зад. Постави в празното квадратче число,
за което да е вярно:**

$13 < \square$

$18 < \square$

$10 < \square$

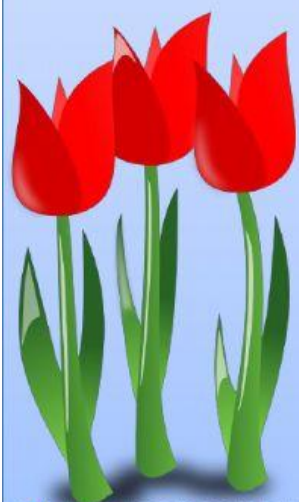

$17 = \square$

$20 > \square$

$15 > \square$

$18 > \square$

$19 = \square$

3 зад. Пресметни:

$9 + 8 =$

$18 - 9 =$

$7 + 8 =$

$17 - 8 =$

$6 + 5 =$

$15 - 7 =$

$2 + 9 =$

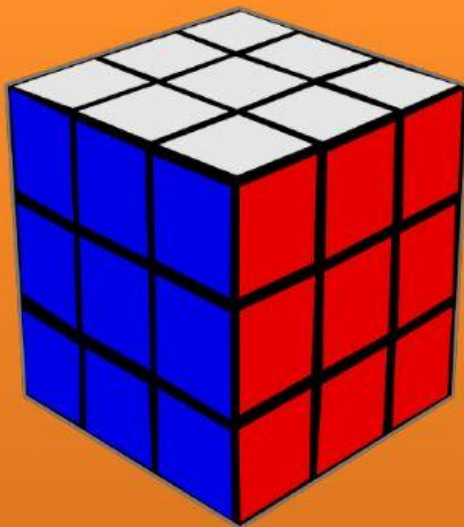

$16 - 8 =$

$7 + 9 =$

$20 - 4 =$

$3 + 8 =$

$19 - 13 =$

4 зад. Напиши липсващите числа:

$$4 + \square = 12$$

$$9 + \square = 18$$

$$\square = 8 + 5$$

$$3 + \square = 12$$

$$14 = 7 + \square$$

$$\square = 15 - 9$$

5 зад. Постави **+** или **-** така, че да е вярно!

$6 \square 6 = 18 \square 6$

$9 \square 9 > 14 \square 3$

$15 \square 8 > 13 \square 8$

$14 \square 6 < 17 \square 7$

6 зад. Постави знаците > = < :

$15 - 3 \square 2$

$11 + 7 \square 9$

$14 + 4 \square 6$

$14 - 4 \square 0$

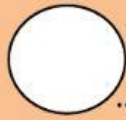

$18 - 3 \square 6$

$15 - 4 \square 11$

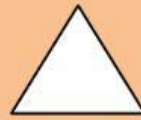

7 зад. Запиши колко са съответните фигури:

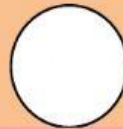

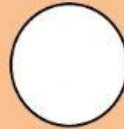

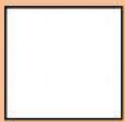

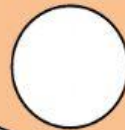

.....

.....

.....

нарисува

а

нарисува с

повече . Колко пеперуди е нарисувало момчето?

Решението на задачата е:

А) $9 + 8 = 17$ (пеперуди)

Б) $9 - 8 = 1$ (пеперуда)
