Questions 33 to 40

Read the following page from a leaflet about shoes and answer the questions that follow.

STAR FOOTWEAR INC.

Did you know that the foot contains more bones than any other part of the body and is vulnerable to injuries? That is why we at STAR Footwear only sell shoes which protect your feet and always ensure your comfort.

Shoe design has varied through time and from culture to culture, with appearance originally being tied to function. We are known for our decorative range which is a popular choice for those occasions when you really need to make an impression.

At STAR Footwear, we cater for other activities too. We sell lightweight boots for shorter hikes, and waterproof ones to keep your feet dry at all times. For your peace of mind, we offer a guarantee with every purchase, and also, for this month only, a free pair of socks.

Components of a Shoe

"The part of the shoe that covers the top of the foot is called the upper. The interior part of the shoe that our foot rests on is the insole. The outermost sole which is directly exposed to the ground is the outsole. The midsole is the layer of material between the outsole and the insole. It provides support, shock absorption and comfort. The heel is the raised component under the rear of the shoe. The part that covers the toes is the toe box"

- Dato' Jimmy Choo, Shoe Designer

September 30, 2021 – Camping Trip

I'm going on a camping trip in a fortnight. I went to a shoe sale at Star Footwear Inc. and decided to buy the most popular brand, (37) _____. I chose waterproof boots as the ground can get very wet where I'm going. I am really happy with them because the (38) _____ they came with is very reassuring, so I can take them back if necessary. The shop also sells lots of what you might call (39) _____ shoes, but what they look like doesn't matter to me. I'm very confident that my new footwear will protect me from any (40) _____ during my adventure. I can't wait for my trip.
