

Questions 6–10

Complete the flow chart below.

Write **NO MORE THAN TWO WORDS** for each answer.

Cloud seeding

The chemical silver iodide is introduced into a cloud by a rocket or by 6

This causes tiny water drops in the cloud to 7, in a process called static seeding.

Lots of very small pieces of 8 join together in a process called riming.

These fall from the sky, turning to rain or snow.

A secondary effect, known as dynamic seeding, occurs when water that freezes 9

Sometimes this can cause the clouds to grow larger and 10
