2. Прочитай текст и выпиши ОДНО лишнее слово из каждой строки:

1 Not doing something it will always be faster than doing it.
2 This statement reminds to me of the old computer
3 programming saying, "Remember you that there is no code
4 faster than no code." The same philosophy applies in so
5 other areas of life. For any example, there is no meeting
6 that there goes faster than not having a meeting at all. This
7 is not to say you should never attend the another meeting,
8 but the truth is that we say yes to many of things we don't
9 actually want to do. There are such many meetings held
10 that don't in need to be held. There is a lot of code written
11 ourselves that could be deleted.
