

Let's read.

Saving Our Environment

Good morning everyone. How are you today? I am Mr. Tan, the Advisor to the Junior Environment Club. I am here to talk about how young people like you can save our Mother Earth.

First, switch off and unplug all electrical gadgets when not in use. If we do not switch off televisions, computers, laptops or telephone chargers, they would still **consume** electricity. Therefore, switch off and unplug the gadgets to save on power consumption.

Next, switch to energy **efficient** lights. Fluorescent or LED light bulbs last longer and use less electricity than **conventional** bulbs. So, switch to energy efficient lights because they are long-lasting and economical.

You can also collect rain water. You can use it to water plants, clean drains and porches. Thus, collecting rain water helps to **conserve** water and save on water bills.

Last but not least, please avoid using **disposable** items. Plastic cups, bags, and containers take a minimum of 20 years to **decompose**. You can use your own bags or refuse to accept plastic bags when shopping. Hence, you can reduce the amount of waste going into landfills.

To conclude, I hope you as the next generation would protect and save our Mother Earth. I would like to end my speech by saying, "Keep the future bright, turn off the light." Thank you.

Answer the questions below. Select the correct answer.

1. What is the speech about?

2. State three ways to save our environment. Select three.

Unplug when not use

Always switch on light

Collect rainwater

Use energy efficient light

3. What happened if we do not switch off or unplug our electrical appliances?

4. What is the difference between fluorescent and a light bulb?

Light bulb saves energy

Fluorescent conserve energy

Light bulb last longer

Light bulb is cheaper

Fluorescent last longer

Fluorescent is cheaper

5. How do we conserve water?
