

AP Biology Topic 1.6 – Nucleic Acids video notes

1. DNA = two antiparallel _____
2. Nitrogenous bases _____

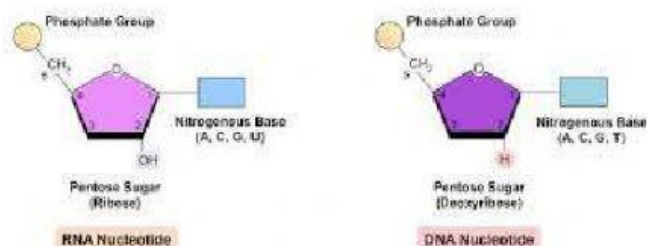

3. What does it mean when they say DNA is antiparallel? _____

4. What type of bonds do ATGC make with each other across the ladder? _____

5.

DNA	RNA

6.

- DNA has a _____
 - o No -OH _____
- RNA has a _____
 - o Has an _____
- What are some differences you see between the structures of DNA and RNA? _____

7. How do DNA and RNA work together to make proteins? _____

8. How are complimentary strands made? _____
