

Three major principles of

THEORY OF CELLS

All organisms are made of _____.

All _____ cells are produced by preexisting cells.

The _____ is the most basic unit of life.

through

begins with

CELL DIVISION

Division of _____

Karyokinesis

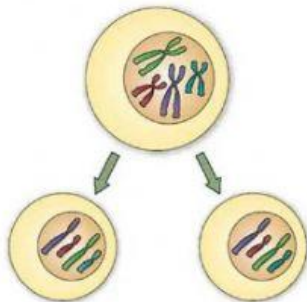

followed by

Division of _____

Cytokinesis

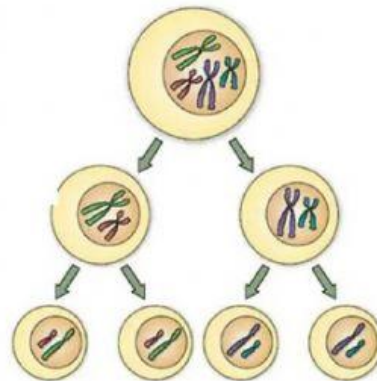

Two types

One parent cell (2n)

Two daughter cells (2n)

One parent cell (2n)

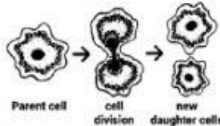

Four daughter cells (n)

Importance

reproduction

Healing wound

Importance

reproduction
