

Work

Name: _____ Code No. _____

IV UNIT – Date: _____

Instructions: Solve the problems below about work. Remember the formula is $W = \text{force} \times \text{distance}$.

1. Calculate the work done by a 47 N force pushing a pencil 0.26 m.
2. Calculate the work done by a 47 N force pushing a 0.025 kg pencil 0.25 m against a force of 23 N.
3. Calculate the work done by a 2.4 N force pushing a 400. g sandwich across a table 0.75 m wide.
4. If a small motor does 520. J of work to move a toy car 260. m, what force does it exert?
Formula: $F = \text{work} / \text{distance}$.
5. How far can a mother push a baby carriage, using a force of 62.0 N if she can do 2920 J of work? Formula: $D = \text{work} / \text{force}$
