5) Read the text. Then, correct the sentences.

**GREEN
SEA TURTLE**

The green sea turtle is one of the largest sea turtles in the world. They live in bays and in the sea near tropical islands. They eat sea plants and sea insects and they often swim far to find food. Green sea turtles sometimes visit beaches and enjoy the sun and the females leave their eggs in the sand.

Green sea turtles are really big. Their length can be about 1 m long and they usually weigh up to 190 kg. The biggest green sea turtle ever found was 1.5 m long and it weighed 395 kg! It's amazing!

These beautiful animals are an endangered species. People hunt them for their meat or for their eggs and they also throw rubbish in the sea. What can we do to help? We must keep the beaches and seas clean!

1. The green sea turtle is one of the smallest sea turtles in the world.

2. They eat sea plants and fish.

3. The males leave their eggs in the sand.

4. They usually weigh up to 395 kg.

5. People don't hunt them.

6) Look at the picture. The children went on a school trip to the countryside.
Write what they were doing when it started raining. Use the phrases in the
box to help you.
