LET´S PRACTICE!

I'm going to offer you some self-checking exercises. The key to get the best results is learning how to write properly the different numbers in the enabled boxes or places. The system is very sensitive, so I suggest you practice first in this worksheet so you understand how to do it and have better results later.

You have to write amounts with 2 decimals followed by € like this:

1.500,65€ or 12.000€ (when decimals are 00)

Imagine material value is 2.500€ but you have paid only 2.000€
Imagine salaries value is 12.400€, completely paid
Imagine financial interest value is 625,30€, completely paid

CONCEPT	COLLECTION	PAYMENT	INCOME	EXPENSE	PRODUCT	COST
Materials						
Salaries						
Financial Interest
