

English Test (1° and 2° grades)

Name: _____ Date: August, 30th Score: ____/30 Max.

Learning Objective (LO)

- To get general and specific information from a reading text.
- To show understanding of the topic of the unit related to communications and technology.

I. - Read the text and answer TRUE or FALSE.

Technology is getting smaller

Cameras

The first cameras were very big. You couldn't carry them around. They were also very expensive. Not many people could buy a camera.

Today we have cameras that we can carry around with us. They are also cheap. Today most cameras are digital. This means we can save thousands of photos on the camera's memory card. We can also change the images.

Telephones

The first telephones needed cables and electricity. You couldn't move them around. The first phones without cables needed enormous batteries. They were used by the military, police and ambulance men. The first real mobile phone was also very big, with a big battery.

Now mobile phones are much smaller. They still use batteries and you have to charge them, but they can take photos and videos, and you can connect to the internet and watch TV!

Music

At first people listened to music on vinyl records. These were big and fragile. Then there were cassette tapes, and later there were CDs. Now you can put thousands of songs on a MP3 player and listen to your playlists wherever you are.

- 1.- The first telephones didn't use cables.
- 2.- The first cameras were very big.
- 3.- At first people listen to music on vinyl records.
- 4.- The first cameras were very small.
- 5.- At first all the people could buy a camera. They were very cheap
- 6.- The first real mobile phone was very small with a small battery.
