

# SOLVING GEOMETRICAL PROBLEMS

## Learning objective:

- I am able to solve geometrical problems using properties of squares and rectangles

## Step to success:

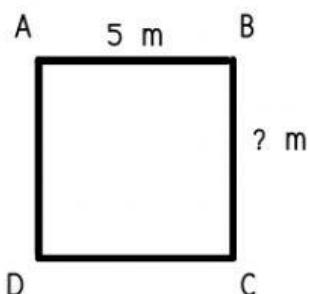

- Read the notes carefully
- Try the question below.

## FILL IN THE BLANKS

1 ABCD is a square.

$$AB = BC \\ = \text{_____ m}$$

$$AD // \text{_____}$$

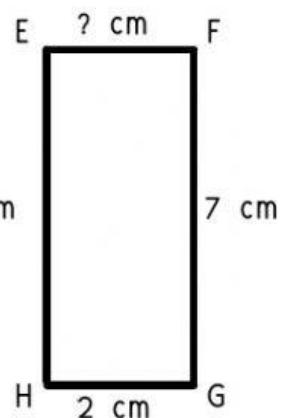

2 EFGH is a rectangle.

$$EF = \text{_____ cm}$$

$$EH = \text{_____ cm}$$

$$\angle FGH = \text{_____}$$

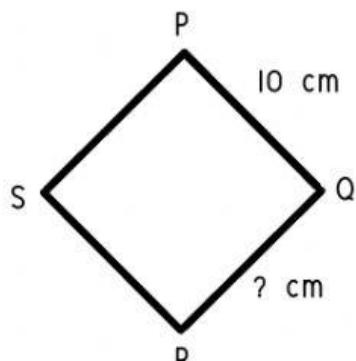

3 PQRS is a square.

$$QR = \text{_____ cm}$$

$$\text{_____} // RQ$$

$$\angle SPQ = \text{_____}$$

4 ABCD is a rectangle.

Its length is twice its breadth

$$AB = \text{_____ cm}$$

$$AD = \text{_____ cm}$$

$$\text{_____} // DC$$
