

Unit 7 – At the animal rescue centre

Lesson 6

1. Read the text quickly and answer these questions.

WILDLIFE Friends

WILDLIFE Friends is an organization that helps British wild animals. We've got seven centres and we work with thousands of animals every year.

- 🐾 We help endangered animals by protecting their habitats.
- 🐾 Sometimes animals are injured in accidents. Our vets look after them.
- 🐾 Sometimes baby animals lose their parents. We look after the orphans in our centres.

ADOPT AN ANIMAL!

WOULD YOU LIKE TO HELP?

It's expensive to look after animals. We need your help. You can adopt one of our animals. We usually have deer, foxes and red squirrels for adoption. We sometimes have badgers and owls too. You give us a donation, and we give your animal a good home here at Wildlife Friends.

THANK YOU, CHO!

Cho visited our hospital on her birthday. She adopted Ziggy. Ziggy is a female badger cub. She's three months old. She's always hungry! She eats worms and insects. She likes plants too. Ziggy hasn't got a mother. With Cho's money we can feed and look after Ziggy for three months.
