

ÁREAS DE CILINDROS

Calcula el área basal y el área lateral de cada cilindro. Luego, calcula el área total.

a.

$$A_b = \boxed{} \pi \text{ cm}^2$$

$$A_l = \boxed{} \pi \text{ cm}^2$$

$$A_t = \boxed{} \pi \text{ cm}^2$$

b.

$$A_b = \boxed{} \pi \text{ m}^2$$

$$A_l = \boxed{} \pi \text{ m}^2$$

$$A_t = \boxed{} \pi \text{ m}^2$$

c.

$$A_b = \boxed{} \pi \text{ m}^2$$

$$A_l = \boxed{} \pi \text{ m}^2$$

$$A_t = \boxed{} \pi \text{ m}^2$$
