

G1 Bookworms 3rd Quarter Test Section 2: Mathematics

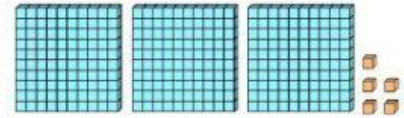

1. Addition and numbers (18 points)

How many?

Write the number that is missing:

51, 61, 71, _____, _____.

150, 145, 140, _____, 130, _____, 120.

Add

$32 + 8 = \underline{\hspace{2cm}}$

$41 + 9 = \underline{\hspace{2cm}}$

$36 + 20 = \underline{\hspace{2cm}}$

$27 + 25 = \underline{\hspace{2cm}}$

$75 + 15 = \underline{\hspace{2cm}}$

$45 + 30 = \underline{\hspace{2cm}}$

$90 + 25 = \underline{\hspace{2cm}}$

$100 + 10 = \underline{\hspace{2cm}}$

Peter spent the weekend on a farm. He counted 3 pigs, 13 hens, 10 horses, 6 turkeys and 1 dog there. How many animals did he count?

Write the numbers:

231: _____

600: _____

123: _____

2. Subtraction. Subtract the numbers. (12 points)

1)	$\begin{array}{r} 457 \\ - 241 \\ \hline \end{array}$	2)	$\begin{array}{r} 674 \\ - 332 \\ \hline \end{array}$	3)	$\begin{array}{r} 869 \\ - 645 \\ \hline \end{array}$	4)	$\begin{array}{r} 748 \\ - 316 \\ \hline \end{array}$
5)	$\begin{array}{r} 695 \\ - 121 \\ \hline \end{array}$	6)	$\begin{array}{r} 378 \\ - 246 \\ \hline \end{array}$	7)	$\begin{array}{r} 974 \\ - 350 \\ \hline \end{array}$	8)	$\begin{array}{r} 582 \\ - 321 \\ \hline \end{array}$
9)	$\begin{array}{r} 756 \\ - 420 \\ \hline \end{array}$	10)	$\begin{array}{r} 867 \\ - 523 \\ \hline \end{array}$	11)	$\begin{array}{r} 699 \\ - 252 \\ \hline \end{array}$	12)	$\begin{array}{r} 825 \\ - 402 \\ \hline \end{array}$

3. True or False? Subtract the numbers and check the box for true if the result is the same or false if the result is different (4 points)

$13 - 3 = 18 - 9$ ☐ true ☐ false	$15 - 6 = 10 - 1$ ☐ true ☐ false
$19 - 4 = 16 - 2$ ☐ true ☐ false	$16 - 8 = 12 - 4$ ☐ true ☐ false
