

Yan-Wah belongs to the Photography Club and she is saving money to buy a camera. So far, she has saved \$9. How much more does Yan-Wah need?

We want to find the amount that Yan-Wah still has to save.

We know that the camera costs \_\_\_\_\_.

Yan-Wah has saved \_\_\_\_\_ so far.

We can write this problem as an addition sentence, and let the letter  $n$  stand for the missing addend.

$$\$9 + n = \$17$$

To solve this problem, we think of a related subtraction sentence from the same fact family.

$$\$17 - \$9 = n$$

Because  $\$17 - \$9 = \underline{\hspace{2cm}}$ ,  $n = \underline{\hspace{2cm}}$ .

Yan-Wah still needs \_\_\_\_\_ to buy the camera.

## Getting Started

Write the related subtraction sentence.

1.  $5 + n = 12$

2.  $n + 7 = 16$

3.  $6 + n = 14$

4.  $n + 7 = 13$

Use a subtraction sentence to help find each missing addend.

5.  $6 + n = 10$

6.  $n + 3 = 7$

7.  $n + 4 = 12$

8.  $7 + n = 15$

$n = \underline{\hspace{2cm}}$

$n = \underline{\hspace{2cm}}$

$n = \underline{\hspace{2cm}}$

$n = \underline{\hspace{2cm}}$

9. 
$$\begin{array}{r} 8 \\ + n \\ \hline 11 \end{array}$$

$n = \underline{\hspace{2cm}}$

10. 
$$\begin{array}{r} n \\ + 9 \\ \hline 16 \end{array}$$

$n = \underline{\hspace{2cm}}$

11. 
$$\begin{array}{r} 8 \\ + n \\ \hline 15 \end{array}$$

$n = \underline{\hspace{2cm}}$

12. 
$$\begin{array}{r} n \\ + 9 \\ \hline 18 \end{array}$$

$n = \underline{\hspace{2cm}}$
