

Name: \_\_\_\_\_ Grade: \_\_\_\_\_

1. Given the value of the variables, fill in the blanks using Addition property.

1. If  $s = 18$  then,  $s + 4 = \underline{18 + 4}$
2. If  $m = 52$  then  $m + 21 = \underline{\hspace{2cm}}$
3. If  $a = 76$  then,  $\underline{\hspace{2cm}} = 76 + 7$
4. If  $r = 24$  then,  $\underline{\hspace{2cm}} = 24 + 14$
5. If  $(t - 10) = 85$  then,  $(t - 10) + 23 = \underline{\hspace{2cm}}$

2. Given the value of the variables, fill in the blanks using Addition property.

1. If  $b = 13$  then,  $b - 8 = \underline{13 - 8}$
2. If  $r = 37$  then  $r - 18 = \underline{\hspace{2cm}}$
3. If  $a = 26$  then,  $\underline{\hspace{2cm}} = 26 - 21$
4. If  $i = 58$  then,  $\underline{\hspace{2cm}} = 58 - 7$
5. If  $(n - 7) = 63$  then,  $\underline{\hspace{2cm}} = 63 - 9$
