Experiments

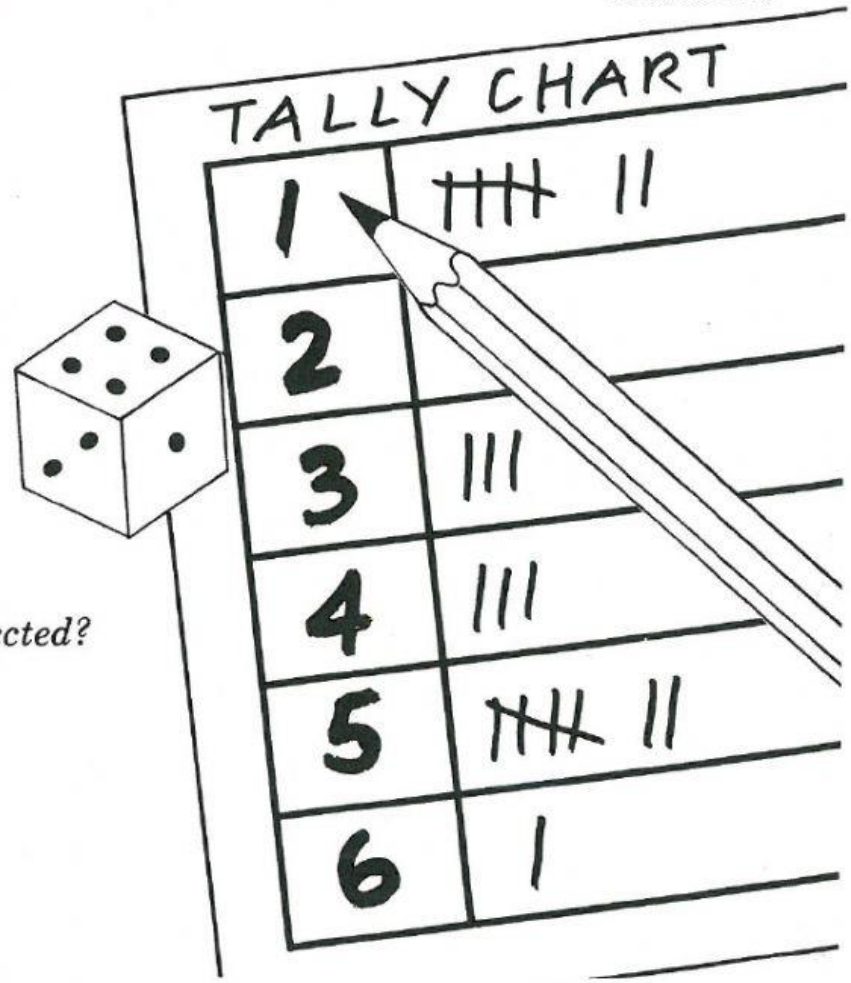
You will need a dice.

1) You are going to throw a dice 60 times.

   About how many 4s are you likely to get?

   Try it. Record each result in a tally chart as you go along.

   Is the result what you expected?



Turn over

2) How many heads would you expect to get if you tossed a coin 50 times?

   Can you explain why?

3) How many times would you expect to get 2 if you spun this 50 times?

   Can you explain why?
