Equivalent Fractions and Simplifying Fractions
Workbook page 13 Q3 and 4

Complete these equivalent fraction chains.

a $\frac{1}{4} \xrightarrow{\times 2} \frac{2}{8} \xrightarrow{\times 3} \frac{3}{12} = \frac{4}{\square} = \frac{5}{\square}$

b $\frac{2}{3} = \frac{4}{6} = \frac{6}{\square} = \frac{8}{\square} = \frac{10}{\square}$

c $\frac{3}{5} = \frac{6}{\square} = \frac{9}{\square} = \frac{12}{\square} = \frac{15}{\square}$

d $\frac{5}{8} = \frac{10}{\square} = \frac{15}{\square} = \frac{20}{\square} = \frac{25}{\square}$

Simplify these fractions. Show the common factor you divided by.

$\frac{12}{18} = \frac{2}{3} \div 6$

a $\frac{4}{20} = \frac{\square}{\square} \div \square$

e $\frac{12}{16} = \frac{\square}{\square} \div \square$

b $\frac{5}{35} = \frac{\square}{\square} \div \square$

f $\frac{9}{15} = \frac{\square}{\square} \div \square$
