

Fracciones de suma y resta con diferente denominador 😊

$$\frac{1}{2} + \frac{3}{4} = \frac{\boxed{} + \boxed{}}{\boxed{}} = \text{---} \rightarrow \text{---}$$

$$\frac{4}{5} + \frac{2}{4} = \frac{\boxed{} + \boxed{}}{\boxed{}} = \text{---} \rightarrow \text{---}$$

$$\frac{3}{4} - \frac{5}{9} = \frac{\boxed{} - \boxed{}}{\boxed{}} = \text{---} \rightarrow \text{---}$$

$$\frac{1}{2} - \frac{2}{8} = \frac{\boxed{} \boxed{}}{\boxed{}} = \text{---} \rightarrow \text{---}$$

Fracciones de multiplicación 😊

$$\frac{1}{2} \times \frac{3}{4} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{4}{5} \times \frac{2}{4} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{3}{7} \times \frac{5}{9} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{1}{2} \times \frac{3}{4} = \frac{\boxed{}}{\boxed{}}$$

Fracciones de división 😊

$$\frac{1}{2} \div \frac{3}{4} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{4}{5} \div \frac{2}{4} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{3}{7} \div \frac{5}{9} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{1}{2} \div \frac{4}{6} = \frac{\boxed{}}{\boxed{}}$$
