**HOME SAFETY**

In the United States there's a burglary almost every 15 seconds. There are a lot of things you can do to protect your house from burglars.

First of all, you shouldn't let people you don't know into your home. You should always look through the peephole before you open the door. It's also a bad idea to leave money, jewelry, or keys next to windows. Always lock all doors and windows when you leave the house, and if possible, install a burglar alarm system and check it often to make sure it works properly.

Other ways to protect your home are to leave the radio on when you are away and put dusk-todawn lights in the garden. Then, anyone watching the house will think that someone is there.

Finally, never put up a fight with a burglar. Just hand over your valuables and then call the police. It's better to be safe than sorry.

**Leonardo da Vinci**

The person I respect the most is Leonardo da Vinci. He was born on April 15th, 1452 in the town of Vinci, Italy. His full name was Leonardo di ser Piero da Vinci, which means Leonardo, son of Piero from Vinci. He was not only one of the greatest painters of all time, but he was also an architect, sculptor, engineer, inventor, mathematician, and musician. Leonardo da Vinci was a very intelligent and imaginative man. He created many different designs. Some of them were for a bicycle, a helicopter, a parachute, and even an airplane! He also liked to study everything in nature. You can find some of his notebooks in museums today. In them, you can see drawings of plants and animals, as well as detailed sketches of the human body! Leonardo da Vinci paid a lot of attention to detail and his paintings are very realistic. The Mona Lisa, for example, is one of his best-known works of art. It is a painting of a woman whose face often makes people wonder if she is smiling or not. I respect Leonardo da Vinci for his amazing works of art and his great inventions. His artwork will last forever.
