

8.16 Groundwater Pollution

SOURCES OF GROUNDWATER CONTAMINATION

1. What chemicals get into drinking water?

2. How does water get into the groundwater aquifer?

3. How does rock dissolve?

4. How does karst aquifers groundwater get contaminated?

5. What are the three types of contaminants?

6. What happens to these contaminants when it rains above a karst aquifer?

7. What do sediments increase pollution in an aquifer?
