

WRITTEN COMPREHENSION

Read the following text and answer the questions. / lis le texte suivant et répons aux questions

Life in 2050

1.

It won't be as tasty as today... in fact, you won't eat anything! You won't cook and do the washing up any longer. You will just receive an injection of food into the arm and have regular blood tests to see what sort of "meals" you need.

2.

You will live better and longer because of your body sensors. They will be connected to a health machine in your home. If you need medical treatment, this virtual doctor will order your medicine automatically.

3.

Space tourism will become normal. You will go and float in the air on space excursions and your space guide will help you be as comfortable as possible in zero gravity. Of course, you'll learn space walking!

4.

You will probably go to work in a driverless car. You won't drive, the car will do it for you. There will be less car accidents because cars will be inter-connected. Maybe you will also have a flying car. You won't have to board an airplane to travel to another country.

1. Match the titles with the paragraphs: / Retrouve les titres des paragraphes, utilise les mots suivants et replace-les au bon endroit!

TRANSPORTS – HOLIDAYS – FOOD – HEALTH

2. Find the caption (= légende) for each picture / retrouve la légende pour chaque image

space tourism

3. Read each paragraph again and find the correct translations of the following words. / Relis chacun des paragraphes et retrouve la traduction des mots donnés.

'1. It won't be as **tasty** as today... in fact, you won't eat anything! You won't cook and do **the washing up** any longer. You will just receive **an injection** of food into the arm and have regular **blood tests** to see what sort of "meals" you need.'

Savoureux

meals
