Mathematics

Addition Without Regrouping

Addition Steps:

1. Place the addends one on top of the other so that the place values fall in the same columns.
2. Add each column together separately, starting with the ones place.
3. The sums go below each column, underneath the line.

Addition keywords for word problems include: sum, altogether, all, in all, together, total, total number, add, increase and increased by.

Example: Allen saved \$1 530. Sally saved \$8 436 more than Allen. How much did they save altogether? $1\ 530 + 8\ 233 = 9\ 763$

$$\begin{array}{r} 1\ 530 \\ +8\ 233 \\ \hline 9\ 763 \end{array}$$
